PROFILE

A multi-skilled and experienced software development Project/Program Manager. Over 10 years of experience in project management.

Experienced in large IT software projects. 15 years of experience in complex environments and applications in the financial sector. Been a part of many successful projects and can handle several projects at the same time. Also worked in the roles of Product Owner and Scrum Master. Used to take responsibility and make decisions, even the toughest ones. Keeping the wheels rolling is a built-in feature.

Experienced to work with Business and IT and understand needs of both. Good communication skills and reports to the stakeholders such as steering groups and business owners. Team player who supports teams in every needed situation. Experienced to work with national and international (multicultural) teams and multivendor environments.

Understands the big picture and smaller details. Participated in the whole application and digitalization processes from the idea to through the development, go-live and maintenance, including for example requirements, concepting, service design, definition, quality assurance, security, testing, analytic and reporting. Always interested in new challenges and learning new things fast.

Agile (SAFe, Scrum, DevOps, Kanban), waterfall and hybrid methods are familiar.

Worked first 16 years as an entrepreneur / consultant in own company. Working expertly as a subcontractor. Contractors and customers have always been satisfied with the results.
